

Instagram Lead Generation — Master Prompt

Web Development • WhatsApp Automation • Calling Agent Services (India)

■■ Pehle ye padho (Important)

Plain ChatGPT / Claude / Gemini (bina live web search ke) Instagram browse nahi kar sakte. Agar koi AI turant real-looking profile links de de bina search kiye, wo links **hallucinated (fake)** ho sakte hain. Best results ke liye is prompt ko:

- Web-search / browsing-enabled AI mein use karo (Claude with Search, ChatGPT with Browsing/Search, Perplexity), YA
- AI se sirf **niche + business type + search keywords + hashtags** nikalwao, aur phir khud Instagram app/website pe search karke real profiles check karo (follower count, bio, recent posts).

Yeh sabse reliable tareeka hai — AI research karega (kaunsi business ko kya chahiye, kaunsa niche target karna hai), aur final verification tumhari Instagram search se hoga. Isse tumhe 100% real, working profile links milenge.

■ Master Prompt (Copy-Paste This)

Neeche wala poora prompt copy karke kisi bhi AI chat mein paste karo. Jahan tak ho sake, web search / browsing feature ON rakhna.

You are acting as my professional B2B lead research assistant for India.

MY BUSINESS: I offer 3 services –

1. Website Development
2. WhatsApp Business Automation (chatbots, auto-replies, order/booking automation)
3. AI Calling Agents (automated voice calling for appointments, follow-ups, lead qualification)

TASK: Research and shortlist SMALL/GROWING BUSINESSES in India that are active on Instagram and are realistic prospects for one or more of my 3 services above.

TARGETING RULES:

- Location: India – EXCLUDE Tamil Nadu and Kerala. Focus on other states/cities (e.g. Gujarat, Maharashtra, Delhi NCR, Punjab, Rajasthan, UP, MP, Karnataka, West Bengal, Telangana, etc.)
- Instagram follower range: 500 to 5,000 followers ONLY (skip anything above 5k or under 500)
- Business types to consider (pick relevant niches yourself, examples):
local restaurants/cafes/cloud kitchens, boutiques/clothing brands, salons/spas, gyms/fitness studios, real estate agents/small builders, coaching/tuition centers, event planners/decorators, interior designers, doctors/clinics/dentists, photographers, jewellery/handmade product sellers, pet grooming/boarding, driving schools, travel agents, bakery/home-bakers
- For EACH lead, do proper research before listing them:

- a) What does their current online presence look like (do they have a website? Are they doing DMs/orders manually? Do they list a phone number for bookings/orders in bio?)
- b) Based on (a), which ONE of my 3 services fits them best and WHY (1-2 line reasoning, specific to their business – not generic)
- c) A short, personalized cold DM opening line I could send them (not salesy, specific to their business)

OUTPUT FORMAT – give me a table with these columns:

#	Business Name	Instagram Handle/Link	Follower Range	City/State	Best-fit Service	Why they need it (1-2 lines)	Suggested DM opener
---	---------------	-----------------------	----------------	------------	------------------	------------------------------	---------------------

QUANTITY: Minimum 20, ideally 30-40 leads. Quality over quantity – do not pad the list with irrelevant or low-fit businesses just to hit the number.

VERIFICATION NOTE: If you do not have live access to browse Instagram right now, tell me clearly which parts are verified vs. which are your best research suggestions (business type + search keywords) that I should verify manually on Instagram before contacting. Do not present unverified guesses as confirmed real profiles.

Start by telling me your research plan (which niches/cities you'll cover), then give me the table.

■ Agar AI ke paas web search nahi hai — DIY search tarika

AI se sirf niche + keywords lo, phir Instagram app mein khud ye try karo:

- Instagram Search bar mein niche + city likho — e.g. "cloud kitchen Surat", "boutique Jaipur", "gym Indore"
- Relevant hashtags explore karo — #suratbusiness #jaipurboutique #indorefitness type
- Follower count profile pe hi dikh jaata hai — 500-5k filter khud apply karo
- Bio check karo — agar "DM for orders" / "Call to book" likha hai matlab unke paas proper website/automation nahi hai = strong lead
- Recent posts dekho — agar wo manually har order/query ka reply comment/DM mein kar rahe hain = WhatsApp automation ka perfect fit

■ Pro Tips (Cold DM Outreach)

- Pehle unki 2-3 recent posts dekho, DM mein ek specific cheez mention karo — generic DM ignore ho jaata hai
- Pehle DM mein sirf ek chhota observation + soft question do, pura pitch mat do
- Ek din mein bahut zyada DM bhejne se Instagram account restrict/flag kar sakta hai — daily limit rakho (roughly 15-20/day naye accounts ke liye)
- Follow-up zaroor karo — zyadatar replies 2nd ya 3rd message pe aate hain

Made for cold outreach research purposes. Always respect Instagram's terms of use and anti-spam limits while messaging leads.
